Year Awarded: 2002

Provider: Zhejiang University - China
Qualification: Master of Engineering
Discipline: Software Engineering
Duration: 3 years
Year Awarded: 2005

Thank you for submitting a KA02 Knowledge Assessment.

Through this process you have used a combination of evidence of academic study and the knowledge and skills gained in the workforce to demonstrate that you have (and can apply) a level of engineering knowledge equivalent to that gained through a Washington Accord degree.

A Washington Accord degree represents the benchmark academic standard for registration as a Chartered Professional Engineer.

In order to gain registration as a Chartered Professional Engineer you would be required to undertake an assessment of your competence through IPENZ.

Yours faithfully

Danielle Davin
Member Experience Manager
